BSAC participated in the National Engineering Month (NEM) by organizing an online panel discussion on March 16th, 2021. This year's NEM theme is Lifelong Learning. BSAC's online panel was organized and facilitated by Prof. Peter Angelo with three CHY program students volunteers. Three members of professional community, including one CHY alumnus, attended the panel and presented on their experiences with furthering the education and careers. The student volunteers prompted discussion from the panel and fielded questions from a group of attendees comprised of Seneca CHY students as well as external guests from other schools and organizations. Students heard experiences, advice, and feedback from the panel on how to be flexible and adaptable in their careers in the field. With the excellent materials and contents as well as the great feedback from the event audiences, Peter and his team won the First Place of NEM Ontario 2021 College Challenge competition. Congratulations to Prof. Peter Angelo and his team members - Duc Quang Nguyen, Ay Ay Alias Christina Liu, and Saad Siddiqui!
