As a part of the National Engineering Month celebration (NEM 2022), Seneca Environmental Association (SEA) organized an informative open panel discussion and Q&A session about the importance of implementing green spaces in our urban environment. 70 attendees participated in the event.

We would like to send many thanks to Don Forster, Allison Hands, and Brian Millward for sharing their experiences and guidance in the environmental field. They covered where Toronto currently stands as a green city, and what we can do to bring us to the next steps to create a greener future. We greatly appreciate the wisdom they brought to the panel and the inspiring words they gave to attendees.

Justin Trudge, Shania Chhom and Larissa Wallisch put a lot of effort to make this event successful under the able guidance of Nahgeib Miller and Mahipal Jadeja.
