Grade Centre/My Grades (Video)

Version 3
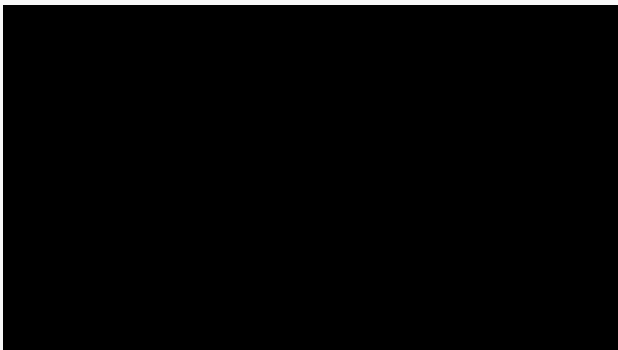

Viewing grades is one of the key reasons that students utilize the Learn@Seneca platform. Viewing grades and monitoring their grades within specific courses allows them to make judgement calls regarding their next academic steps and pathways further into their program, and alongside work-term eligibility. Setting up your Grade Centre will allow your students to be aware of their standings and ultimately impact how their academic career may progress.
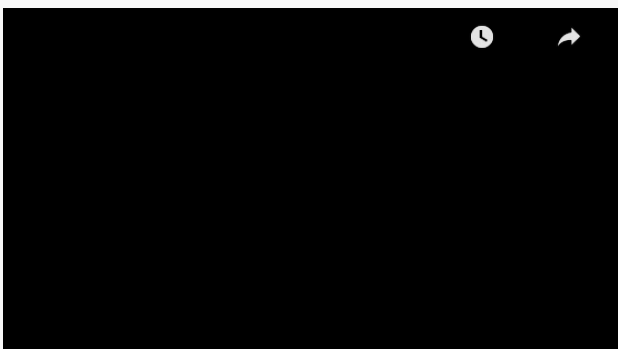

Please note: Grade Centre is the only college-approved method to share assessment marks with students. Tools such as OneDrive should not be used to store private student information.

Follow the guides below to help you navigate and setup your Grade Centre:

Hiding Columns within Grade Centre:

Add a Column and Grades into Grade Centre:
