

SEMET Industry Visit

Version 8

Published 11/15/2022 by [Lena Tang](#) Last updated 3/20/2024 6:25 PM by [Laura Ojanen](#)

SEMET brought their students to one of the leading transformer manufacturers – Atlas Transformer. Students learned about different transformer parts and the entire manufacturing process.

They enjoyed learning about every part of the process and asked many questions. Their curiosity was infectious! They met with employees working in different departments who shared the ins and outs of the manufacturing process with them.

SEMET is a big supporter of academic and industrial partnerships, which provide opportunities to our graduates to prepare for real-world challenges.
