# Finding Images for Modules

Published 5/13/2024 by Dani Bobak

The AI Design Assistant is integrated with Unsplash and can suggest search words to help you find royalty-free images for your modules.

## Finding Images for Modules

1. Select the **three dots (...)** associated with an existing module and then select **Edit**.

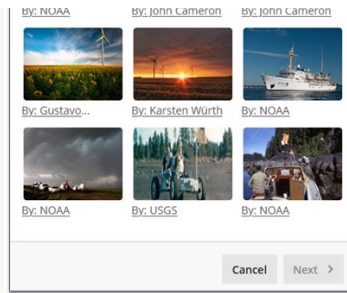

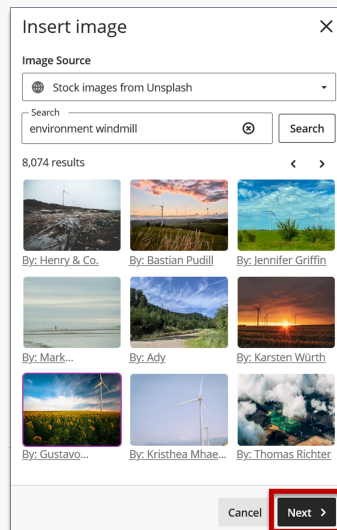

2. In the Image section, select the image icon.

3. From the drop-down menu, select **Stock Images from Unsplash**. The AI Design Assistant will suggest keywords to search Unsplash for a course image (banner). You can change the keywords and run the Unsplash search again.
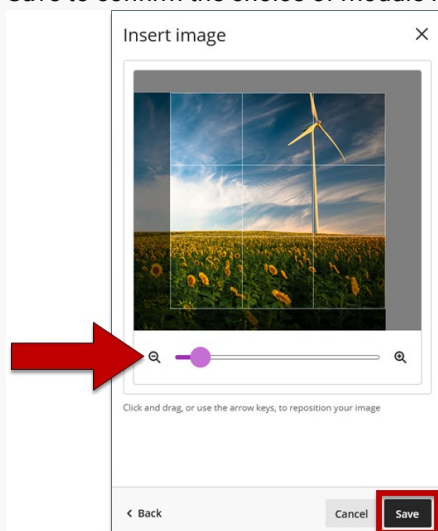

4. Navigate through the image results until you find the one you want to use. Select the image and then select **Next**.

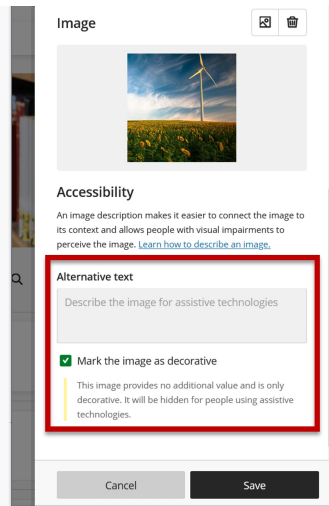

5. Select and drag, or use the arrow keys, to reposition the image. You can Zoom in or out as needed. Select Save to confirm the choice of module image.

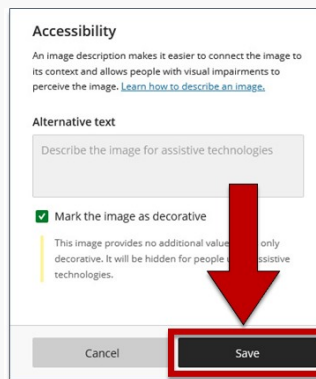

6. If the image is decorative, keep the checkmark beside **Mark the image as decorative**. Content marked as decorative won't provide descriptions to screen readers. However, if the image is informative, remove the checkmark beside **Mark the image as decorative**. Then input the description of the image in the **Alternative text** box.

7. Select **Save**.
