The most commonly asked questions from Teaching & Learning will be answered here:

1. Is there an AI Detection tool that I can use at Seneca?

- No, there is no AI detection tool used at Seneca. There are no reliable detection tools yet. Those that are available – GPTZero, Turnitin, Originality.ai, etc – have been found to misidentify original student content as AI generated, with some findings demonstrating that “these detectors consistently misclassify non-native English writing sample as AI-generated, whereas native writing samples are accurately identified.”

2. Can I submit students' work into AI detection tools and other AI tools for grading?

- Students have not consented to having their work submitted to these tools, which opens questions related to data privacy and security.

Other frequently asked questions have been answered by ITS, visit the [ITS Copilot@Seneca](#) space.
