Academic Integrity Tools

Version 9

Published 6/18/2024 by David Trinh   Last updated 4/11/2025 4:38 PM by David Trinh

These tools can be used to help minimize academic integrity violations.
Note some of theses can also be used to help engage students within the classroom (e.g. screenshare, polls, etc).

Lockdown Browser

On a Seneca Lab computer (the ones in our class), login to myapps.senecapolytechnic.ca.
Search for "lockdown" and launch "Respondus LDB" (the first icon).
Once the app launches, close it.
On a browser (e.g. chrome / edge), log into Learn@Seneca and navigate to the Test (use "sample test" to practice).
When prompted, allow it to open Respondus.
This will allow you to attempt the test.

Faronics Insight

"Faronics Insight empowers teachers with the ability to monitor, communicate and effectively educate students from one central computer."

The video provides a comprehensive guide on using Faronics Insight, a classroom management software.
