We are proud to announce the launch of a dedicated [resource space](#) for Respondus LockDown Browser and Monitor. This new space has been designed to provide faculty and students with the tools and guidance they need to complete online assessments on a secure, proctored platform. Whether you're a seasoned user or new to Respondus tools, this space is your go-to hub for how-to articles, best practices, and resources.

Note: While Respondus LockDown Browser and Monitor integrate with Learn@Seneca Blackboard Ultra and can help deter academic integrity infractions, the software is not foolproof. Respondus will not eliminate all possibilities of academic integrity violations, nor does it guarantee accessibility. Please consider alternative assessments to maintain the integrity and accessibility of online assessments.

What Is Respondus LockDown Browser and Monitor?

Respondus LockDown Browser is a secure browser that prevents students from navigating away from the exam page during an online test. It blocks access to other websites, applications, and tools to ensure a controlled testing environment. When combined with Respondus Monitor, an AI-powered proctoring solution, the system takes online testing security a step further by recording students during exams. Monitor flags suspicious behaviors or irregularities, enabling faculty to review and maintain academic integrity.

What's Inside the Resource Space?

The Respondus Resource Space is tailored to address the common needs of faculty using Respondus tools. Here's what you'll find:

- Step-by-Step Instructions: Clear, detailed instructions for setting up LockDown Browser and Monitor in Learn@Seneca Blackboard Ultra.

- Privacy Considerations: Information on Seneca's privacy policy guidelines and best practices when using Respondus.
- Training Videos: Quick, easy-to-follow video tutorials that help both faculty and students get started.
- Best Practices: Tips and recommendations to create effective, fair, and secure assessments.
- Faculty and Student Checklists: Comprehensive lists for both faculty and students as they are setting up their Respondus products.
- FAQ: Solutions to common technical challenges faced by faculty or students during implementation.

Why Use This Space?

The shift to online learning and assessment has made maintaining academic integrity more important than ever. While Respondus LockDown Browser and Monitor can provide an option for online proctored assessments, we do encourage the use of [alternative assessments](#) to ensure both integrity and accessibility. The Resource Space equips faculty with the knowledge and tools to streamline the process, ensuring assessments are both secure and efficient.

Start Exploring Today!

Ready to enhance the integrity of your online assessments? Visit the Respondus Resource Space now to access comprehensive materials and find the support you need for a smooth experience. Access the space here: [Respondus LockDown Browser + Monitor](#). Be sure to visit often to stay informed about new features, enhancements, and policy updates related to Respondus.
