

Add Module

Published 11/4/2020 by [Anonymous](#)

Modules

Modules are collections of related content, links, and/or services that appear on My.Seneca tabs (e.g. Home and My.Stuff). Modules allow you to view information important to you from within My.Seneca.

"Add Module" and "Personalize Page" buttons appear on every tab that you can add modules to.

Add Module

1. Click the **Add Module** button at the top left of the page.
2. From the list of available modules, select the check box to the left of the module you wish to add.
3. Scroll to the Bottom or Top of the page and click **Submit**.

Personalize Page

The Personalize Page button allows users to customize the colour scheme. Click on the **Personalize Page** button, choose a colour scheme and click **Submit**.
