

Rapid Skills Micro-Credential

Published 12/1/2020 by [Anonymous](#)

Seneca College has successfully applied and received funding from the Ontario Government for the Rapid Skills initiative to support the Advanced Manufacturing sector. We've partnered with Magellan Aerospace to train their employees by providing 5 workshops over a total of 90 hours leading to a Seneca Micro-credential in Advanced Manufacturing. In order to enhance the virtual online CNC workshops, we're in the process of developing 360 Videos in [our labs](#) within the CITE Building (K) at Newnham Campus.
