in the **December 2018 issue**

The CITE eClassrooms have been equipped with new technology to enhance the existing eClassroom experience that you currently receive at Newnham and other campuses. The CITE classrooms have the following technologies added:

- **AODA podium** – these podiums can be adjusted for height with a push of a button
- **Touch screen monitor** – these are installed on the podium providing interactivity like a tablet
- **Short-throw laser interactive projector** – projected content allows for interactivity like a tablet
- **Ink2Go software** – this allows you to annotate on the touch screen monitor or on the projected image on the whiteboard

ITS with the Teaching & Learning Centre will hold drop-in training sessions for faculty teaching in the CITE classrooms.

The training will take place during the weeks of December 17 and January 2 in the FAST Lab (B2078) at Newnham Campus. Register in [MyPD](#).

For more information, visit ITS's and webpages.
