Every term, Seneca's Centre for Institutional Data and Enterprise Analytics (C-IDEA) administers a Course Assessment Survey (CAS) to all students enrolled in a course offered by FCET. The survey gives students an opportunity to provide their input about the courses they are taking and to give you valuable feedback to help direct your teaching strategies.

This survey is administered online. Students receive a unique link at their Seneca email address and can complete the survey starting Week 9 until Week 12.

Survey results will be shared with you. Only courses that receive 5 or more assessments will be included. Response rates are highest in those courses in which the instructor encourages and reminds their students to participate.
